## 7. Risks

---

All investments carry risks, and this structured investment involves a high level of complexity and exposure to external variables. Investors must assess whether the following risk factors are acceptable given their personal financial circumstances:

- **Performance Risk:** Returns are contingent on the success of digital advertising campaigns run by third parties. Market conditions, competition, seasonality, consumer trends, and changes in digital platforms (e.g. Google Ads algorithms) can all significantly affect performance outcomes.
- **Capital Loss Risk:** This product does not offer any capital guarantee. A total loss of invested capital is possible if campaign performance metrics are not achieved. Past success of similar campaigns is not indicative of future performance.
- **Liquidity Risk:** This product is illiquid. It is not listed on any exchange, cannot be redeemed early, and may not have any resale market. You must be prepared to commit capital for the full term of the investment.
- **Counterparty and Issuer Risk:** The performance of your investment may be impacted by the creditworthiness, solvency, or operational failures of the issuer, service providers, or campaign platforms. A default or financial failure may result in loss of capital and/or returns.
- **Operational Risk:** Errors in campaign tracking, misreporting of metrics, or reliance on unaudited data may result in inaccurate performance assessment. Fraud or manipulation by advertising agencies or third-party data processors may also materially impact returns.
- **Regulatory Risk:** Changes in applicable law — including advertising regulations, consumer protection laws, or ASIC guidance on structured products — may affect the viability or structure of this product.

**worldwide  
banners**

- **Data Dependency Risk:** Return calculations depend on data feeds from digital platforms (e.g. Google Analytics, Facebook Business Manager). Any disruption, restriction, or tampering of this data could delay or alter payment outcomes.
- **Market Sentiment Risk:** Demand for digital advertising fluctuates with economic conditions. If brands reduce marketing budgets, campaign scale and success metrics may drop, reducing the potential return.
- **Tax Risk:** Tax treatment is not uniform and may differ based on your individual situation. In some cases, income may be taxed at higher marginal rates rather than capital gains rates.
- **Technology Platform Dependency Risk:** The product depends on third-party digital platforms. Any outages, policy changes, or API limitations may affect data access, performance reporting, and overall strategy.
- **Model Risk:** Investment outcomes are based on campaign modelling and return projections. If models are flawed or assumptions incorrect, the actual performance may significantly deviate from expectations.
- **Concentration Risk:** Where the product is exposed to a limited number of campaigns or advertising channels, underperformance in a specific area may disproportionately impact total returns.
- **Early Termination Risk:** In specific scenarios (e.g., issuer default, force majeure, fraud, regulatory intervention), the product may be terminated early, and you may not receive your full capital or expected return.
- **Currency Risk:** If the underlying ad campaigns or costs are linked to foreign currencies (e.g., USD), exchange rate fluctuations may influence the value of returns.

Capital Guard Pty Ltd is the product issuer and AFSL holder. Worldwide Banners Pty Ltd acts as its Authorised Representative (No. 1314512) and may assist in distributing products and handling client interactions on Capital Guard's behalf.

**worldwide  
banners**

- **Behavioral Risk:** Investors may misunderstand the complexity or overestimate potential returns based on marketing material or cognitive biases.
- **Reinvestment Risk:** Upon maturity, comparable investment opportunities with similar characteristics and return potential may not be available.

You should read this section carefully and assess with your adviser whether the product is suitable for your objectives, risk appetite, and financial circumstances.

### **Early Redemption Fee**

This product is designed to be held to maturity. However, early redemption may be permitted at the sole discretion of Capital Guard AU Pty Ltd, the product issuer. Where early withdrawal is approved, the amount returned to the investor will be based on the market value of the investment at the time of redemption, which may be less than the initial investment.

These fees reflect the administrative and economic costs associated with early withdrawal, including the impact on pooled campaign allocations and fund-level liquidity.

Early redemptions may result in a total return that is significantly lower than the original investment, and investors are strongly advised to consider this risk prior to requesting early exit. All early redemption requests are assessed on a case-by-case basis and are subject to approval by Capital Guard AU Pty Ltd.

## 9. Indirect Costs

---

The Fund may incur indirect costs from time to time, which are embedded in the unit price and not charged directly to the investor. These may include regulatory filing costs, external audit and tax reporting, technology platforms, and data services used in tracking and managing advertising performance.
